CPS-DIO-0808L

CPS-DIO-0808BL (Built-in Power Supply)

\*The photograph is a CPS-DIO-0808L.

## Features

**Opto-coupler isolated input (supporting current sink output) and opto-coupler isolated open-collector output (current sink type)**  
CPS-DIO-0808L and CPS-DIO-0808BL, with response speed of 200μsec, have the opto-coupler isolated input 8 channels (supporting current sink output) and opto-coupler isolated open-collector output 8 channels (current sink type).

### Power for opto-coupler operation (12VDC 30mA) supplied internally [CPS-DIO-0808BL]

The power to run the opto-coupler (12VDC 30mA) is supplied internally. You can decide whether you want to use the internal or external power with the software setting.\*1

\*1 The internal power supply is fixed to ON when connected to the BXC200 CONPROSYS IoT Edge controller.

### All of the input signals are usable as interrupt events

You can use all of the input signals as interrupt events and also disable or enable the interrupt in bit units and select the interrupt edge.

### Digital filter to prevent input signals from carrying noise or a chattering

This product has a digital filter to prevent input signals from carrying noise or a chattering. All input terminals can be added a digital filter, and the setting can be performed by software.

### Output circuits include zener diodes for surge voltage protection

Zener diodes are connected to the output circuits to protect against surge voltages.

The rated output is 35VDC, 100mA to the maximum per channel.

### Compact design

Compact design, 25.2 (W)×94.7(D)×124.8 (H), features flexibility in installation.

### Adaptable to a temperature range between -20 and +60°C

The product is capable of operating in the temperature between -20 and + 60°C. It can be installed in the various environments.

### Installation easy with two pieces of terminal support and DIN rail

You can install and remove a terminal connector without a screwdriver so that it can shorten the time of the replacement. As the product can be not only mounted on DIN rail, but also is removable along the side rails, replacing is simple and easy as well.

### Equipped with LED for an operation check

The product has LED for an operation check, which helps you visually confirm the communication status of each interface.

This product is a configurable module to provide digital input and output interface and operates along with the configurable type controller of CONPROSYS series.

CPS-DIO-0808L and CPS-DIO-0808BL have 8 channels of the opto-coupler isolated input, and 8 channels of the opto-coupler isolated open-collector output per module.

Plus, CPS-DIO-0808BL has a built-in power supply (the setting can be performed by software\*1).

\*1 The internal power supply is fixed to ON when connected to the BXC200 CONPROSYS IoT Edge controller.
