\* Specifications, color and design of the products are subject to change without notice.

**Features**

Opto-coupler isolated Output (supporting current sink output)  
This product has the opto-coupler isolated Output 8 channels (current sink output) whose response speed is 200μsec or less.

Internal circuit power supply (CPSN-DO-08BL only)  
The CPSN-DO-08BL's internal circuit has a built-in power supply, so no external circuit power supply is necessary.

Output circuits include zener diodes for surge voltage protection.  
Zener diodes are connected to the output circuits to protect against surge voltages.  
The rated output is 35VDC, 500mA to the maximum per channel.

Easy installation and removal  
This product can be installed in and removed from the CPU unit without any tools.

Adaptable to a wide range of temperature between -20 and +60°C  
The product is capable of operating in the temperature between -20 and + 60°C. It can be installed in the various environments.

Equipped with the LED for an operation check  
The product has the LED for an operation check, which helps you visually confirm the communication status of each interface.

No electrolytic capacitor  
Without an electrolytic capacitor, which has a limited life, we are creating the product with a longer life.

This product is an expansion module that adds a digital output interface to the CPU unit of the CONPROSYS nano series.

CPSN-DO-08L has the opto-coupler isolated Output 8 channels (current sink output) whose response speed is 200μsec or less. This product can also be used with an external circuit power supply of 12 to 24 V.

CPSN-DO-08BL has the opto-coupler isolated Output 8 channels (current sink output) whose response speed is 200μsec or less. This product's internal circuit also has a built-in power supply, so no external circuit power supply is necessary.
